Program Specific Outcomes (PSOs)
B.Sc – Computer Science

PSO-1: Understand the fundamental theories, concepts and applications in basic areas of research in Computer Science.

PSO-2: Enables students to prove themselves in different professional examinations like ICET, AUCET, NIMCET e.tc

PSO-3: Provides basic idea about information technology, about internet and computer programming.

PSO-4: To provide adequate basic understanding about Computer Science and its applications.

PSO-5 To exploit emerging technologies in Computer Science and its related discipline.

PSO-6 To expose adequate training to the computing environment in Software Development, Database development, Web interface designing etc.

PSO-7 To inculcate training & practical approach, internship is given to be trained among the students in the field of Computer Science.

PSO-8 To equip the students with sufficient exposure and skills to enable them in attaining a deserving position in Software Industry.
